

A New Era in Laboratory Leadership.

The University of Chicago announces a new partnership to manage the Argonne National Laboratory.

Committed to producing outstanding science for the benefit of our nation.

Under the University of Chicago's leadership, Argonne has been a pioneer in scientific and technological achievement in the energy, physical, biological and computational sciences.

Beginning October 1, 2006, the University of Chicago will manage the Laboratory through UChicago Argonne, LLC, a new entity created to meet the Department of Energy's needs and advance its mission.

Together with its new partners, Jacobs Engineering Group, Inc. and BWX Technologies, Inc., and through important alliances with Northwestern University and the University of Illinois at Urbana – Champaign and the University of Illinois at Chicago, the UChicago Argonne, LLC will combine the finest scientific leadership with best practice management methods to ensure safety and efficiency.

The UChicago Argonne LLC stands ready to address some of the most pressing scientific and technological problems facing our nation.
